

## Finding the right dental equipment shouldn't be like pulling teeth.

As busy dentists and oral surgeons, you're dependent on your equipment to do your job. But who do you depend on for the best in equipment sales and service?

At EMT, it's our job to keep your practice running smoothly. So whether you're looking for new equipment, repairing a broken unit or trying to squeeze a little more life out of an older piece, EMT can simplify your equipment management process.

### **EMT's services include:**

- New and pre-owned dental equipment including chairs, lights, x-rays, air compressors, vacuum pumps, handpieces and more
- Reconditioning of existing equipment
- Office design including custom cabinetry
- In-stock replacement parts for common items such as bulbs, gaskets and blood pressure cuffs
- Medical gas and vacuum piping systems including oxygen and nitrous oxide installed to meet NFPA 99C health care guidelines
- Safety testing and calibration to Medicare, Triple A, JACHOA and other standards, including reminders to flag you when your equipment is due for testing
- Same-day emergency service and repairs, Monday through Saturday
- No-charge loaner equipment

Best of all, EMT's responsive, personal service means one phone call is all it takes to find, repair or maintain the equipment you rely on every day.
