

Call us in the morning and watch your equipment headaches disappear.

The last thing a busy doctor's office needs is equipment headaches. Whether you're looking for new equipment, fixing a broken unit, or trying to squeeze a little more life out of an older piece, EMT can simplify your equipment management process.

EMT's services include:

- Office design including custom cabinetry
- New and pre-owned medical equipment including exam tables, stools, lights and more
- In-stock replacement parts for common items such as bulbs, blood pressure cuffs and gaskets
- Medical gas and vacuum piping systems including oxygen and nitrous oxide, installed to meet NFPA 99C health care guidelines
- Reconditioning of existing equipment, including exam table recovering
- Same-day emergency service and repairs, Monday through Saturday
- No-charge loaner equipment
- Safety testing and calibration to Medicare, Triple A, JACHOA and other standards, including reminders to flag you when your equipment is due for testing

Best of all, EMT's responsive, personal service means one phone call is all it takes to make your equipment headaches disappear.
